DEPLOYMENT SCREEN (Single Player)
Once you have selected a campaign and mission from the Single Player menu, press **OK**. Your insertion into the mission will begin. Once this process is completed you will be brought to the Deployment screen. From here you can review your mission's goals, view a map of the region, and adjust your weapons load-out. When you are ready to begin the mission, press the space-bar.

GETTING AROUND
Movement controls are similar whether you are on foot or in control of one of the game's vehicles.

Basic movement controls use a combination of the mouse and the four adjacent keys pictured here. This control scheme is known as “WASD Control.”

To use WASD, rest one hand on the keyboard, with your middle finger on the “W” key while resting your other hand on the mouse.

To move forward, use the mouse to point in the direction you want to go, then press “W.”

Advanced movement options are listed in the CONTROLS section of this guide (Page 10).

GOALS
While on a mission you must accomplish a number of given goals in order to advance. These goals can be displayed at any time by pressing “G.”

THE GPS MAP
The GPS map on the upper right corner of the Game Screen makes finding your current goals easy. Just follow the arrow on the map to arrive at the next waypoint or goal location. You can zoom in and out on the mini-map with the +, - buttons. If you want to cycle through your waypoints, you can do so by pressing “F7.” The GPS map also makes it easy to identify friendly forces, vehicles, and other vital intel. You can view a larger map by pressing “M.”

WEAPONS
To equip a weapon, press the appropriate number key. Your primary weapon will always be available by pressing “3.” The name, picture and remaining ammunition of your currently equipped weapon is displayed in the upper left corner of the Game Screen. Remember, your ammunition is limited.

To fire your weapon, simply click the **LEFT MOUSE BUTTON**. You can improve the accuracy of any weapon you are holding by standing still, crouching (x), or lying prone (z).
Certain weapons have scopes. By pressing the **RIGHT MOUSE BUTTON** you can enter scope mode. While in scope mode you will have improved focus and accuracy. However, you will automatically be taken out of scope mode whenever you are moving.

In certain missions, glowing green boxes containing weapon Power-Ups are available. These boxes will contain a weapon that you can use to help you achieve your goals. Run over a weapon Power-Up to acquire the weapon inside.

**AMMO**
Various caches of ammunition are located in the field. Keep your eyes open for blue ammunition boxes, which will reload the weapons currently in your inventory. Do not ignore these boxes; they can mean the difference between success and failure.

**ATTACHING TO OBJECTS**
When you approach vehicles or emplaced weapons that you can interact with, a green attachment box will appear. When you see this box, interact with the object by pressing the “action” key (“**SHIFT**” by default).

**VEHICLES**
In certain missions you may be required to operate land, air and water vehicles. To do this, walk up to the vehicle's control surface and press the “action” key (“**SHIFT**” by default). This will put you in control of the vehicle.

Use WASD control to move the vehicle.

To shift gears, press the appropriate key.

“**Z**” - Low gear
“**X**” - Medium gear
“**C**” - High gear

**EMPLACED WEAPONS**
On the battlefield you may come across high firepower emplaced weapons. To use them, walk up to the weapon so that the control option is highlighted and press the “action” key (“**SHIFT**” by default). Fire by clicking the **LEFT MOUSE BUTTON**. Press “**SHIFT**” again to disengage from the weapon.

**EXPERIENCE POINTS**
In the single player game, experience points are earned by eliminating enemy forces. Bonuses are awarded for excellent marksmanship. A soldier’s best performance is remembered and displayed whenever a player completes the mission.
